Barcodes, drawn as bars

Each barcode below is drawn as bars, not pasted in as a picture, so it prints exactly as wide as it should. Under each one is what a scanner reads back.

FR-1964413

REF 2026-07-16/ACME

Codes built and sized other ways

Each module below is a whole number of printer pixels, so every bar edge falls on a pixel. Under each code, what it carries and how it was built.

40063813339301
Digits packed two to a character: 112 modules of 4 pixels at 288 dpi

40063813339301
The same digits one character at a time: 189 modules

01234565
A UPC-E, its zeros left out: a scanner hands back the UPC-A 012345000065

9780201379624
An EAN-13 with the five-digit add-on 52495 beside it, 9 modules away
