What a font file states about itself

Three faces read from their files. Each is set once in its own letters, and under it every figure is read out of the file, none written by hand.

DejaVu Sans

DejaVuSans, of the family DejaVu Sans: quadratic outlines, a TrueType font; 2048 units to the em; 6253 glyphs.

Traits: none.

At 10 pt it rises 9.3 and falls 2.4; capitals: 9.3; lower case: not stated; it asks 0.0 between lines; it slants 0.0°; every glyph stands within [-2090 -948 3673 2524] units.

An underline at 10 pt sits -0.2 pt from the baseline, 0.4 pt thick; the file states -40 and 90 units.

Its own flag: it may be embedded and installed; it may be cut down; its outlines may be carried.

Code pages it claims: 1252, 1250, 1251, 1253, 1254, 1255, 1256, 1257, 1258, Mac, OEM, 869, 866, 865, 864, 863, 862, 861, 860, 857, 855, 852, 775, 737, 850, 437.

W advances 2025 units across and 2048 down the page; the glyph named Eacute: É; “Façade 2026” takes 11 glyphs, runs 64.6 pt at 10 pt and 110.0 pt down the page. It states nothing of setting down the page.

Read as a symbol font, code 0x41: none.

Variation selectors it names sequences for: 0; a zero followed by U+FE00: not stated.

IBM Plex Sans

IBMPlexSans, of the family IBM Plex Sans: cubic outlines, an OpenType font with CFF outlines; 1000 units to the em; 1017 glyphs.

Traits: none.

At 10 pt it rises 10.2 and falls 2.8; capitals: 7.0; lower case: 5.2; it asks 0.0 between lines; it slants 0.0°; every glyph stands within [-260 -245 1241 1119] units.

An underline at 10 pt sits -1.0 pt from the baseline, 0.6 pt thick; the file states -95 and 60 units.

Its own flag: it may be embedded and installed; it may be cut down; its outlines may be carried.

Code pages it claims: 1252, 1250, 1251, 1253, 1254, 1257, 1258, Mac.

W advances 891 units across and 1000 down the page; the glyph named Eacute: É; “Façade 2026” takes 11 glyphs, runs 59.0 pt at 10 pt and 110.0 pt down the page. It states nothing of setting down the page.

Read as a symbol font, code 0x41: none.

Variation selectors it names sequences for: 0; a zero followed by U+FE00: not stated.

Spectral

Spectral-Regular, of the family Spectral: quadratic outlines, a TrueType font; 1000 units to the em; 1480 glyphs.

Traits: none.

At 10 pt it rises 10.6 and falls 4.6; capitals: 6.6; lower case: 4.5; it asks 0.0 between lines; it slants 0.0°; every glyph stands within [-202 -250 1331 1057] units.

An underline at 10 pt sits -1.2 pt from the baseline, 0.5 pt thick; the file states -120 and 50 units.

Its own flag: it may be embedded and installed; it may be cut down; its outlines may be carried.

Code pages it claims: 1252, 1250, 1251, 1254, 1257, 1258, Mac.

W advances 981 units across and 1000 down the page; the glyph named Eacute: É; “Façade 2026” takes 11 glyphs, runs 53.6 pt at 10 pt and 110.0 pt down the page. It states nothing of setting down the page.

Read as a symbol font, code 0x41: none.

Variation selectors it names sequences for: 0; a zero followed by U+FE00: not stated.

The first file is added twice, to set across the page and to set down the page.

This document is told to carry, and name in a warning, a font whose own flag forbids embedding it.
