What arrived, page by page

Each row shows a page of the pack as it arrived, and the stamp that page was given.
Both are forms, and both are fitted to the cell the table leaves them, whole and undistorted.

Sheet	Stamp	What was found	Reference
	Accepted	Delivery note The whole page, at a sixth of its size: nothing was redrawn, and nothing was left out.	DN-4471
	Query	Packing list Two lines disagree with the delivery note, so the sheet waits on the sender.	PL-4471
	Accepted	Certificate of conformity Signed and dated, and filed with the batch it covers.	CC-4471
	On hold	Weighbridge ticket The weight reads, the time does not, so the sheet is held until a clean copy arrives.	WB-4471

The first row and the third carry one stamp: a drawing costs its operators once, wherever it lands.
