Minutes of the works council

Thursday 12 March 2026, 17:00, meeting room 2

This sheet claims the second part of the archival standard, at the level that promises one thing and one thing only: the page will look the same in thirty years as it does today. Every face it draws with is carried inside the file, every colour says what it means, and nothing on the page waits on a program, a network or a font that happens to be installed. The second part names no carried file the way the third does, so a record that has to travel with a spreadsheet or an invoice claims the third part instead.

Present	Nine members of the council and two of the board
Apologies	One member, on leave
Next sitting	Thursday 9 April 2026, 17:00
