Schedule of charges, second half of 2026

This schedule claims the third part of the archival standard at its highest level. It may carry a file of any kind, and it says what it is made of: this line is a heading, the block below is a paragraph, and the rule across the foot is furniture that says nothing at all.
Something reading the schedule aloud follows the order the tree gives rather than the order the ink was laid down in, and the table behind the page travels inside the file for a program to take whole.

Carriage stands at 12.40 the consignment, handling at 1.85 the parcel, and storage at 0.40 the day. A charge takes effect on the day the consignment is accepted.
