Parts of the housing

Picture	Part	What it is for
	Cover plate	Closes the housing once the board is seated.
	Rating label	Carries the serial number and the supply it is rated for.
	Heat scale	Read against the winding to say how hot it is running.

Every picture above is marked as a figure and carries the words a reader hears in its place, so nothing in this list is lost on somebody who cannot see it. The table itself is a branch of the structure tree: each row is a row there too, and each cell says which column it sits in.
