Northfield Acoustics

Price offer

Reference Q-2026-0147 · issued on 2026-10-25 · valid for sixty days

For Harbour Theatre: the acoustics of the main hall

Following our visit on 2026-10-12, we propose to measure how the main hall answers speech and music, to fit sound-absorbing panels along the side walls and under the balcony, and to tune the room once they are up, so that an actor speaking without a microphone is heard clearly from the last row.

Survey: acoustic measurements from twelve seats, report	1 850.00 EUR
Supply and fitting of 48 fabric-covered panels	14 400.00 EUR
Tuning after fitting, second measurement, final report	2 200.00 EUR
Total excluding VAT	18 450.00 EUR

Prices exclude VAT. Thirty per cent on order, the balance on completion. Work can start four weeks after the signed price offer reaches us.

Try to copy a word of this page

Every letter on this page is a shape traced from the outline of its font: the file holds no text at all. A reader sees the price offer exactly as it would otherwise look, but can neither select a word, nor search for one, nor copy the prices into another document, and a program that extracts text finds nothing. A sender uses this when a document must be read but not taken over. What it costs: nothing can be read aloud, there is no structure for accessibility, and the file is larger.
